

Segregate and other genera

The genus *Narcissus* was determined and named by Linnaeus in 1753. A number of segregate genera (listed below) were recognized and named by later botanists, notably R.A. Salisbury (1761-1829) and A.H. Haworth (1768-1833). However, the segregate genera are now regarded as synonyms of the genus *Narcissus* and are disused. It has been considered appropriate to revert to the single genus *Narcissus*.

The following segregate genera appear in synonymy.

Ajax Salisbury ex Haworth, Syn. Pl. Succ.: 326 (1812)
Argenope Salisbury, Gen. Pl. Fragm.: 102 (1866)
Assaracus Haworth, Monogr. Narcissin.: 4 (1831)
Aurelia Gay, Ann. Sci. Nat. Bot. 4th series, 10: 95 (1858)
Autogenes Rafinesque, Fl. Tellur. 4: 20 (1838)
Calathinus Rafinesque, Fl. Tellur. 4: 21 (1838)
Chione Salisbury, Gen. Pl. Fragm.: 100 (1866)
Chloraster Haworth, in Philos. Mag. 63: 103 (1824)
Codiaminum Rafinesque, Fl. Tellur. 4: 21 (1838)
Corbularia Salisbury, in Trans. Hort. Soc. London 1: 349 (1812)
Cydenis Salisbury, Gen. Pl. Fragm.: 99 (1866)
Diomedes Haworth, in Philos. Mag. 62: 440 (1823)
Ganymedes Salisbury, in Trans. Hort. Soc. London 1: 353 (1812)
Helena Haworth, Monogr. Narcissin.: 13 (1831)
Hermione Salisbury, in Trans. Hort. Soc. London 1: 357 (1812)
Illus Haworth, Monogr. Narcissin.: 4 (1831)
Jonquilla Haworth, Monogr. Narcissin.: 7 (1831)
Moskerion Rafinesque, Fl. Tellur. 4: 21 (1838)
× *Narcibularia* H.R. Wehrhahn, Gartenstauden 1: 204 (1929)
Oileus Haworth, Monogr. Narcissin.: 4 (1831)
Panza Salisbury, Gen. Pl. Fragm.: 99 (1866)
